MIDI interface™

With Tape and Drum Sync

For Computer Connection For MIDI Equipped Synthesizers

The package includes:
- 1 MIDI Interface module with connections for MIDI/IN, MIDI/OUT, TAPE/IN, TAPE/OUT, and DRUM CLOCK
- 2 MIDI DIN cables (five foot male to male)
- 1 MIDI Users Guide

The Passport MIDI Interface is for use with:
- Commodore 64 or Apple II+, IIe or Compatible Computers
- Any MIDI equipped synthesizers
- Conventional or MIDI drum machines
- Any analog tape recorder

The Passport MIDI Interface has become a recognized standard in the music industry. Providing the communication link between MIDI equipped synthesizers, drum machines and the personal computer, Passport's MIDI Interface opens up a vast new world of musical potential. You can use your computer and MIDI equipped instruments to compose, record, edit, score, print, study, and store music more easily and efficiently than ever before. Each MIDI Interface lets you sync to and from MIDI, tape, and drum machines, giving you great flexibility for performing and recording. Since the Passport MIDI Interface is supported by more software developers and synthesizer manufacturers than any other interface card of its kind, you'll have access to the largest library of music application software programs on the market.

Passport Designs Inc. is the first software company in the world to be dedicated entirely to the development and sale of music software. Our commitment to providing musicians with the most advanced technology available has led to the development of our MIDI Performance, Printing, and Education Series of integrated MIDI software programs. Look for Passport's growing line of programs at fine music stores worldwide.
